Use-Case Model

1. Use-Cases Identification

Use case: Place Order of available resources

Level: User goal

Primary actor: Manager

Main success scenario:

1. The user opens the application
2. The system prompts the user to log in
3. The user writes his credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user clicks on “Resources” button
8. The system opens the page of Available Resources
9. The user clicks on the desired resource
10. The user views resource details
11. The user selects the amount they want to order
12. The user clicks submit
13. The system validates the data
14. The system shows a success message
15. The system redirects the user to the home page

Extensions:

- 5'. The system finds the credentials invalid
- 6'. The system returns to the login screen.
