## Use-Case Model

### 1. Use-Cases Identification

**Use case:** Sign up for a hiking route

**Level:** user goal

**Primary actor:** hiker

**Main success scenario:**

1. The user opens application
2. System prompts user to log in
3. User writes credentials
4. User clicks login
5. The system validates the credentials
6. The system redirect the user to home page
7. The user clicks on “Find Routes” button
8. System opens the Hiking Routes page
9. User selects a route
10. User selects date
11. User registers for the route
12. System collect registrations
13. System finds similar registered users
14. System displays the found users.
15. User found Hiker Buddies

**Extensions:**

- 5'. The credentials entered are wrong.
- 6'. System discards the data
- 7'. System displays an error message.
- 8'. System returns to login page.
