Use-Case Model

1. Use-Cases Identification

Use case: Suspend User

Level: user goal

Primary actor: moderator

Main success scenario:

1. The moderator opens the application
2. The moderator selects the “Login” option
3. The moderator writes his credentials
4. The moderator clicks “Login”
5. The system validates the credentials
6. The system redirects the moderator to the home page
7. The moderator navigates the site and notices a user whose conduct interferes with the service rules
8. The moderator clicks the name of the user
9. The system redirects the moderator to the user’s profile page
10. The moderator clicks the “Suspend” button
11. The system provides a page where the moderator can select the duration and reasons for the suspension
12. The moderator fills in the data and clicks “Submit”
13. The system displays a confirmation dialog
14. The moderator confirms
15. The system marks the user as suspended and redirects the moderator back to the user’s profile page

2. UML Use-Case Diagrams
