# Use-Case Model

## 1. Use-Cases Identification

**Use case:** Make Online Order for cookies

**Level:** user goal

**Primary actor:** shop's client

**Main success scenario:**

1. The user opens the application
2. The system prompts the user to log in
3. The user writes his credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user clicks on "See Orders" button
8. The system opens the orders list page
9. The user chooses an order to visualize
10. The system opens the order view page

**Extensions:**

- 5'. The system finds the credentials invalid
- 6'. The system returns to the login screen.
