Use-Case Model

1. Use-Cases Identification

Use case: Rate purchase

Level: user goal

Primary actor: traveler

Main success scenario:

1. The user opens the application
2. The system prompts the user to log in
3. The user writes his credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user clicks on “Purchase History” button
8. The system opens the user’s Purchase History page
9. The user selects a purchase
10. The user clicks the rate button
11. The use introduces a rating
12. The user introduces feedback (optional)
13. The use clicks the submit button
14. The system calculates the new rating of the company
15. The system shows a success message
16. The system redirects the user to the home page.

Extensions:

- 5'. The system finds the credentials invalid
- 6'. The system returns to the login screen.
- 9'. The user has no purchases.

2. UML Use-Case Diagrams
