Use-Case Model

1. Use-Cases Identification

Use case: Create a New Song Project

Level: user goal

Primary actor: musician

Main success scenario:

1. The user opens the application
2. The system prompts the user to log in
3. The user writes his credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user clicks on “Create New Song” button
8. The system opens the new song project page
9. The user selects a channel to record
10. The user chooses between using instrument samples or recording an instrument on that channel
11. The user inputs the instrument samples/recorded instrument
12. The user saves their progress
13. The system stores the project
14. The system shows a success message

Extensions:

- 5'. The system finds the credentials invalid
- 6'. The system returns to the login screen.

2. UML Use-Case Diagrams
