1. Use-Cases Identification

Use case: See Diary

Level: user goal

Primary actor: user

Main success scenario:

1. The user opens the application
2. The system prompts the user to log in
3. The user writes their credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user clicks on “View My Diary” button
8. The system opens personal diary page
9. The user selects a food
10. The user clicks on “Show Details” button
11. The system opens a new windows with details about the selected food
12. The user can view details about the selected food/update the food intake/delete the food.

Extensions:

- 7'. The system cannot find any diary
- 8'. The system returns an error message prompting the user to create at least one diary.
