Use-Case Model

1. Use-Cases Identification

Use case: Create account

Level: user goal

Primary actor: cinema owner

Main success scenario:

1. The user opens the application
2. The system prompts the user to log in
3. The user choses the option to create a new account
4. The system prompts the user to register
5. The user choses the type of account as cinema owner
6. The user introduces new credentials
7. The user clicks "Register" button
8. The system checks the credentials
9. The system introduces the new account into the database
10. The system redirects the user to login screen

Extensions:

- 8'. The system finds the credentials invalid
- 9'. The system returns to the register screen.

2. UML Use-Case Diagrams
