Use-Case Model

1. **Use-Cases Identification**

Use case: Filter cookies based on ingredients
Level: user goal
Primary actor: shop's client
Main success scenario:
1. The user opens the application
2. The system prompts the user to log in
3. The user writes his credentials
4. The user clicks login
5. The system validates the credentials
6. The system redirects the user the home page
7. The user chooses to view the list of cookies
8. The system displays the list of cookies and a combo box with all the ingredients
9. The user chooses any number of ingredients
10. The system displays all the cookies which contain/do not contain the selected ingredients

Extensions:
5'. The system finds the credentials invalid
6'. The system returns to the login screen.
